

INSTRUCTIONS FOR PRINTING MY GOSPEL TRACTS

The "One Page Picture Bible" is an 8.5 x 11 document that would need to be printed front & back (Duplex) in the Landscape orientation, and then folded twice (vertical and then horizontal) to have the first page as the cover.

All the other tracts are similar except for the Title approaches - they are 8.5 x 14 legal size paper, and need to be printed front & back in the Landscape orientation, and then folded twice (both horizontal) to have the Title page as the front cover.

If you do not have access to a printer at home or work for this personal-ministry purpose, check with your Church office to see if they would let you use theirs (and perhaps buy your own paper, unless they don't mind). Or you could put the document on a portable data stick and bring it to any kind of a copy/print store or business supplies store like Staples or Office Depot etc, or even perhaps a Library or Post Office with printing machines available, and do them there.
